

Native Americans and the impact of Early European Settlers

1. Using research and your own knowledge from the Loom presentation. List and describe at least two things that the early settlers started to do when they arrived in America (what could they grow, what did they want to find, what did they trade etc.)?

2. What part of America were these early colonies based in?
Why?

EXT Were there any differences in location between the Spanish, English and French?

3. What did the Europeans bring with them that caused problems to the Native Americans? How did this affect the Native American populations? You should be able to think of at least two.

4. Pick two or three sentences from 'Colours of the Wind' that you feel best describe the differences between the European Settlers and the Native Americans. In each case, explain what you think it shows.
