

THE LIFE OF 2081

In the future, we might have flying cars as a mode of transport to reduce fossil fuels and solve the traffic.

Flying car

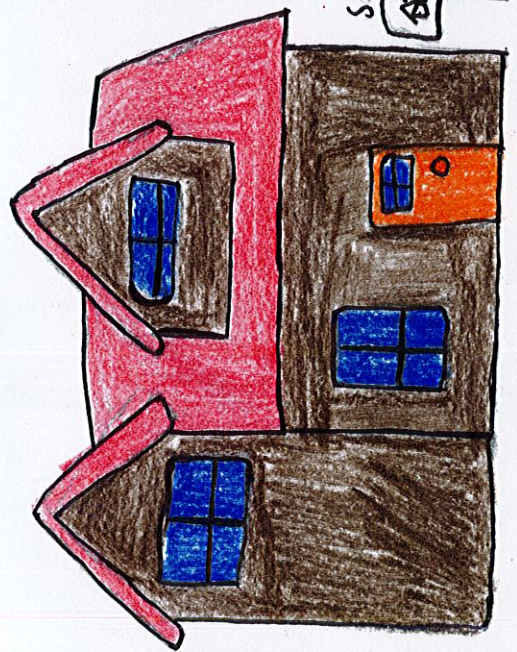

Robot Teachers

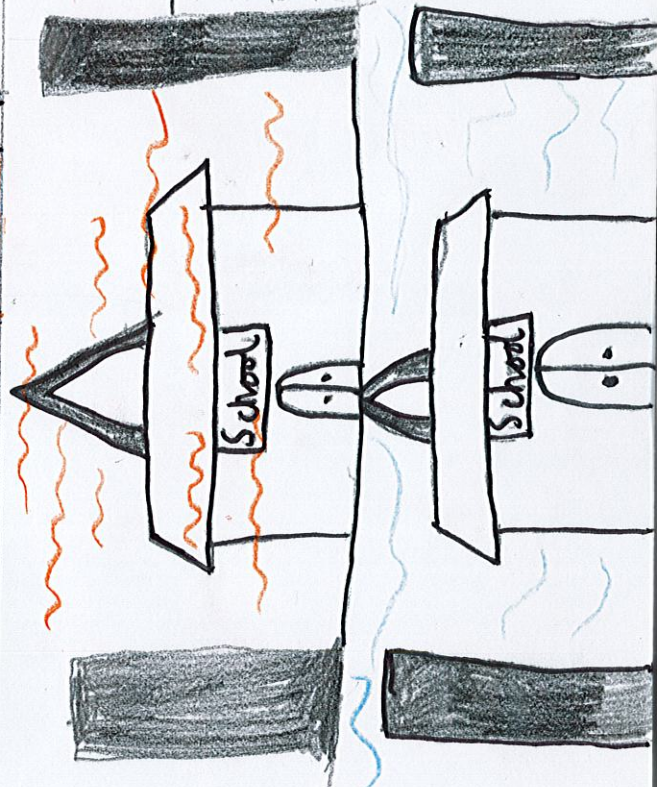

In the future, people might get taught by robots because they will be programmed to know everything.

Houses

In the future, I think instead of buying houses from other people you can buy the house device and they they will bring

selecta house

In the future teachers and students will become more of a problem.
